The Mission Aviation Fellowship (M.A.F.) are offering Surrey Horticultural Federation Clubs & Societies Free Talks

The Mission Aviation Fellowship or M.A.F. Is the world's largest humanitarian air operator. For over 75 years, they have been flying light aircraft (M.A.F. currently run 116 aircraft) over mountains, jungles, swamps, and deserts, in locations where journeys can take days or weeks by road, but only minutes or hours by plane. The M.A.F. have flown more than 1500 aid, development, and mission organisations to bring medical care, emergency relief, and long-term development projects to remote communities. Their pilots and workers deliver aid workers, doctors, pastors, and school equipment. When disasters occur the M.A.F. can help by delivering water, food, and medicines quickly.

Some examples of The Mission Aviation Fellowship's work include:

- 1) Transit camp of 150,000 people in Renk in Southern Sudan. In just one day the M.A.F. transported more than half a ton of medical supplies to the camp and brought back 16 refugees in need of treatment.
- 2) In Simba, 3,000 people depend on coffee picking to survive. Every year, they rely on M.A.F. to fly that coffee to cities be sold on their behalf.

The M.A.F. would welcome an opportunity to speak at group meetings, to spread the word about the work they're doing, all of which would not be possible without the donations they receive (Only 20p in the pound goes on M.A.F.

overheads!). The M.A.F. have a speaker who gives a talk and power-point presentation on their work, which lasts about 20 minutes. M.A.F. talks are totally free - just provide the coffee! To book a Mission Aviation Fellowship talk, please contact **Clive Bailey** via email, clive.bailey86@gmail.com or telephone **07917 726 117**.

Do you need certificates for your Flower Show?

Report Asian Hornet Sightings

Think you've seen an Asian Hornet? Report it!

Report through the Asian Hornet Watch app or www.bit.ly/asianhornetreport

Asian Hornets have been sighted in the UK in recent years. Why does this matter? The Asian Hornet is highly aggressive predator of our native insects; entomologists feel that the Asian Hornet poses a significant threat to honey bees and other pollinators.

Two Asian hornet nests were found in Surrey in September 2023. The nests were subsequently destroyed by experts from DEFRA. Keep up to date with [Asian hornet sightings by clicking here](#).

If you think you've seen an Asian Hornet, take a photo if you can. Please take care and do not disturb an active nest. Members of the public who suspect they have found an Asian Hornet should [report it to the NNSS through their online form](#) or by emailing alertnonnative@ceh.ac.uk.

A free ID sheet is available from the GB Non-Native Species Secretariat (NNSS). [Click here to view detailed pictures to help you correctly identify an Asian Hornet.](#)
